

Targeted solutions for the off-the-track Thoroughbred (OTTB)

Muscle Health

- Hard training produces oxidative stress that damages muscle and nerve cells.
- Diets deficient in antioxidants, such as vitamin E, cause increased oxidative damage.
- Supplementing with natural vitamin E supports muscle and nerve cell recovery.

Elevate® Maintenance Powder

Highly bioavailable natural vitamin E.

Elevate® Se

Highly bioavailable natural vitamin E with organic selenium.

Hooves

- The demands of training and racing break down hoof tissue.
- Additional biotin, trace minerals, amino acids and fatty acids support strong, resilient hooves.

Ker-A-Form™

Coat and hoof formula designed to address brittle hooves and dry skin.

Digestive Health

- An OTTB may have ulcers and hindgut imbalances that lead to loss of appetite and health problems.
- High-quality probiotics and prebiotics along with stomach buffers support healing and rebalance the digestive tract.

Neigh-Lox® Advanced

Multi-pronged approach that supports complete GI tract health, reducing the risk of ulcers, colic, diarrhea and laminitis.

Energy

- Many Thoroughbreds are hard keepers.
- A concentrated energy source may be required to maintain weight.
- Fats contain more energy than other feedstuff.
- Fats reduce the hormone spikes associated with excitability.

Equi-Jewel®

All-natural, high-fat stabilized rice bran when extra calories are needed.

Coat

- A number of nutrients impact skin and coat health.
- Trace minerals and essential amino acids are needed to grow a strong mane and tail.
- Added fat restores healthy skin and a shiny hair coat.
- Omega-3 fatty acids reduce skin inflammation and mitigate allergic reactions.

EndurExtra®

High-fat supplement with added natural vitamin E and digestive aids to support a healthy appetite and weight gain.

Contribute™

Complete complement of omega-3 fatty acids that support lower levels of inflammation.

Joint Health

- Racing and training are very stressful to joints.
- Supplementing with high-quality glucosamine, chondroitin, and hyaluronic acid minimizes inflammation and aids in the repair of damage.
- Omega-3 fatty acids reduce swelling and pain in damaged joint tissue.

Joint Armor™

Total joint support for active horses of all ages.
