

Digestive Support Supplement Decision Tree

Targeted supplements for digestive support

Kentucky Performance Products and Wisser Concepts® offer veterinarians targeted solutions to digestive tract issues.

ProbioticWise®

Innovative, research-proven formula that combines *Saccharomyces boulardii* and fermentation metabolites, which:

- Captures and sweeps out pathogenic bacteria.
- Supports healing and maintains healthy gut tissue.
- Sustains a robust microbiome.

Recommended for horse challenged by:

- Acute or chronic diarrhea, regardless of etiology
- Colonic and gastric ulcers
- Foal scours
- Gas colic
- Hindgut imbalances

Active ingredients in a one-ounce scoop:

- 20 billion CFU *Saccharomyces boulardii* (a true probiotic)
- 2,500 mg fermentation metabolite (broad spectrum prebiotics)

Supplementation levels vary based on individual horse's age and needs.

ProbioticWise and Neigh-Lox Advanced are available through your veterinary supplier. Call your representative to order today.

S. boulardii

Neigh-Lox® Advanced

Developed to maintain normal gastric environment and support a healthy hindgut. Neigh-Lox Advanced has long-acting ingredients to support normal pH levels for up to 8 hours.

The ingredients in Neigh-Lox Advanced:

- Maintain normal gastric acid levels and a healthy mucosal lining.
- Support normal pH and inflammatory levels in the hindgut.
- Sustain a healthy microbiome.

Recommended for horses challenged by:

- Gastric and colonic ulcers
- Gas colic
- Hindgut acidosis and imbalances
- Weight loss and poor appetite

Active ingredients in a two-ounce scoop:

- 5,600 mg Aluminum phosphate
- 5,600 mg DASC
- 5 billion CFU *Saccharomyces boulardii* (a true probiotic)
- 1,750 mg Dried yeast fermentation metabolites (broad spectrum prebiotics)

Supplementation levels vary based on individual horse's age and needs.
