

# Electrolyte Comparison Chart

## Summer Games® Electrolyte

### Ingredients: 1-oz serving provides Per 1 oz

Calcium.....	170 mg
Phosphorus.....	150 mg
Salt.....	16.7 g
Magnesium.....	160 mg
Potassium.....	3.5 g
Copper.....	10 mg
Iron.....	52 mg
Manganese.....	4 mg
Zinc.....	25 mg

### Recommended for:

- Daily electrolyte replacement and to encourage drinking in horses of all ages.
- Horses in light to moderate work, seniors, horses in hot, humid climates, horses being shipped/trailerred regardless of distance. During the winter, to support adequate hydration.

### Unique advantages:

- Research-based formula replaces the electrolytes and trace minerals lost in sweat.
- Concentrated formula makes it easy to adjust the level of supplementation as environmental and/or workload conditions change.
- Available in a powder and a paste. Paste contains a stomach buffer.

## ElectrolyteWise™

### Ingredients: 1-oz serving provides Per 1 oz

Calcium.....	170 mg
Phosphorus.....	150 mg
Salt.....	17.6 g
Sodium.....	6.9 g
Magnesium.....	160 mg
Potassium.....	3.5 g
Chloride.....	13.2 g
Copper.....	10 mg
Iron.....	52 mg
Manganese.....	4 mg
Zinc.....	25 mg
Niacin.....	19.7 mg
d-pantothenic acid.....	18.3 mg

### Recommended for:

- Daily use in horses that are under stress or as needed to support electrolyte replacement and hydration in acute situations.
- Horses in vigorous training/competition, heat-stressed or dehydrated horses, in support of other treatments for colic and diarrhea.

### Unique advantages:

- Research-based formula provides electrolytes in proper ratios, chelated trace minerals, and B vitamins often found lacking in a stressed horse.
- Concentrated formula makes it easy to adjust the level of supplementation as needed to address acute or chronic issues.
- Sold through licensed veterinarians only.

## Endura-Max™ Electrolytes

### Ingredients: 1-oz serving provides Per 1 oz

Sodium.....	5,528 mg
Chloride.....	11,886 mg
Potassium.....	3,657 mg
Calcium.....	754 mg
Magnesium.....	153 mg

### Recommended for:

- Specifically formulated to support electrolyte, mineral balance and hydration in endurance horses. Use daily while in training and as needed during competition.

### Unique advantages:

- Unlike other electrolytes, Endura-Max contains added calcium and magnesium. During long rides, calcium and magnesium may be lost in amounts high enough to result in such metabolic disorders as thumps and tying up. Calcium and magnesium are added to Endura-Max in highly available forms, so they are quickly absorbed and readily available.
- Available in a powder or a paste. The paste contains stomach buffers.
